

NEW GENERATION OF YIELD WITH MATURITY

- ✓ **Very high yields of dry matter**
- ✓ **Very good cob ripeness from large cobs**
- ✓ **Above average quality**
- ✓ **Suitable for silage, crimping and plastic**

DOMINATOR

NEW GENERATION OF YIELD WITH MATURITY

Cob Ripeness

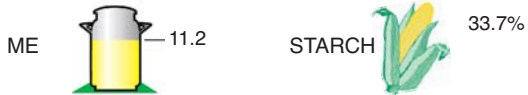

Extremely good cob ripeness for its maturity group. Above average number of grains per cob, 15% more than NK Bull and 10% more than Kroesus.

Maturity Group

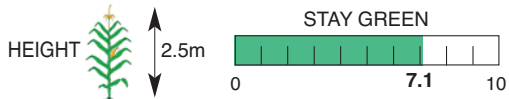

Matures similar to Klifton the group 7 control, suitable for a wide range of growers. Dominator shows the same early maturity when grown under plastic.

Quality & Digestibility

Whole plant digestibility high in NL trials at 70%
High levels of mature starch from big cobs.

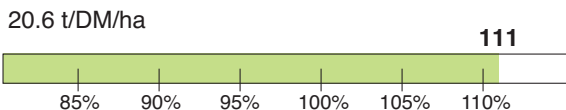

Plant Description

Very even single cross with prostrate leaves giving a good canopy. Big strong plant.

Healthy plant that retains green leaf until ready to harvest - chops and ensiles well.

Yield

Sow at 45,000 seeds per acre 111,000 seeds per hectare
Dominator continues to yield between 11-13% more than the NIAB control variety in NIAB and Maizetech trials.
