

DOMINATOR

Cob Ripeness*		Surprisingly early grain maturity for maturity 7 variety. Very large cob with high number of grain sites.
Maturity Group*		High potential in main yielding group of varieties.
Quality	Undergoing test by NIAB	High grain yields in Danish crimping trials. Very high starch content. Highly digestible cellulose.
Plant Description*		Tall plant with prostrate leaves forming good canopy early in season. Low cob setting and good lodging resistance. Sow 45,000 seeds per acre (111,000 seeds per hectare).
Yield		Very even single cross hybrid. First year of testing by NIAB in 2008. Exceptional performance in breeders UK trials 2007.

*** Maizetech Trials**

Stay Green - The ability of the plant to photosynthesis to harvest (1 = low, 10 = good)

Maturity - Ability to reach harvest (1 = slow, 10 = fast)

Cob Ripeness - Measurement of true grain maturity at harvest (1 = low, 10 = high)

DOMINATOR

DOMINATOR Early - Maximise Yields in Good Maize Areas

- ✓ Group 7 variety where yields are maximised.
- ✓ Massive yields 114%
- ✓ Potential for crimping and under plastic.
- ✓ Early grain maturity.
