

# NANCIS

<b>Cob Ripeness*</b>		Simply still the earliest grain maturity of any variety tested.
<b>Maturity Group*</b>		On challenging sites producing high quality silage matters to ensure high levels of output.
<b>Quality</b>	ME  11.1      STARCH  34%	Ensure high starch, high dry matter, silage is clamped every season.
<b>Plant Description*</b>	HEIGHT  2.1m      STAY GREEN  0 5 10	Conventional tall variety that matures naturally rather than death from disease. Sow 45,000 seeds per acre (111,000 seeds per hectare).
<b>Yield</b>	85% 90% 95% 100% <b>87</b>	High yields of dry matter are clamped without compromising harvest date.

**\* Maizetech Trials**

**Stay Green** - The ability of the plant to photosynthesis to harvest (1 = low, 10 = good)

**Maturity** - Ability to reach harvest (1 = slow, 10 = fast)

**Cob Ripeness** - Measurement of true grain maturity at harvest (1 = low, 10 = high)
