Grainseed Ltd.

Es AGREEMENT

EARLY - VERY STABLE WITH PROVEN RELIABILITY

Cob Ripeness

Good size, attractive, well filled cobs with good grain maturity.

Maturity Group

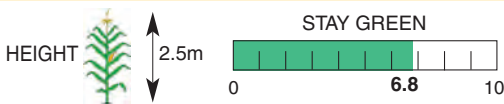

Good maturity from a well balanced plant. Over the years continues to show very good maturity under plastic- earlier than Justina.

Quality & Digestibility

Good well balanced silage suitable to be fed at high levels for beef and dairy herds.

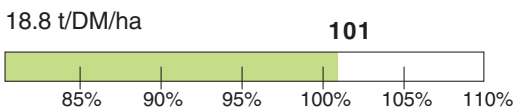

Plant Description

Big strong, single cross variety with very good standing power.

Greener plant giving an increase in plant digestibility.

Yield

Sow at 45,000 seeds per acre 111,000 seeds per hectare
Consistently very good yields, both conventionally and under plastic, from a very stable reliable variety.

Excellent yield in NIAB trials 2011= 112% @ 32.4% dry matter
